

Task Splitting - Tango Telematics

UI/UX Developer: Hariharan

Role: Frontend

Developer: Manohar Singh

Role: Backend

Assigned Module: Tier 1 (F1) – Vehicle Registry

Tasks:

- Develop the Vehicle Registry UI.
- Display all vehicles from the seeded database.
- Show vehicle status (Active / In Shop / Idle).
- Implement the Vehicle Details page.
- Integrate frontend with backend APIs.
- Implement backend APIs to fetch vehicle list and vehicle details.

UI/UX Developer: Hariharan

Role: Frontend

Developer: Manohar Singh

Role: Backend

Assigned Module: Tier 2 (F5) – Trip Logging & History

Tasks:

- Create the Trip Logging page.
- Record a trip (Vehicle, Driver, Distance, and Date).
- Create the Trip History page.
- Display all recorded trips.
- Implement filterable trip history (Vehicle, Driver, and Date).
- Implement backend APIs to record a trip.
- Implement backend APIs to fetch trip history.
- Driver Assignment and Trip listing

UI/UX Developer:Hariharan

Role: Frontend

Developer: Vishnu Sudhakaran

Role:Backend

Assigned Module: Tier 2 (F2) – Driver Roster & Assignment

Tasks:

- Develop the Driver Roster UI.
- Display all drivers from the seeded database.
- Implement vehicle assignment functionality.
- Validate that a driver can only be assigned to one vehicle at a time.
- Integrate frontend with backend APIs.
- Implement backend APIs for driver listing and vehicle assignment.

UI/UX Developer:Hariharan

Role: Frontend

Developer: Vishnu Sudhakaran

Role: Backend

Assigned Module: Tier 1 (F3) – Maintenance Alerts

Tasks:

- Create the Maintenance Alerts page.
- Display vehicles that are overdue for maintenance.
- Highlight overdue vehicles clearly.
- Show the reason for the alert (Mileage Overdue or Service Date Overdue).
- Implement backend APIs to fetch maintenance alerts.
- Apply the maintenance rules from the starter kit README.

UI/UX Developer: Hariharan

Role: Dashboard / Frontend

Assigned Module: Tier 1 (F4) – KPI Dashboard

Tasks:

- Create the KPI Dashboard page.
- Display Total Vehicles vs Active Vehicles.
- Display Fleet Utilization (%).
- Display Overdue Maintenance Count.
- Display the Top 5 Highest-Cost Vehicles.
- Ensure the dashboard is responsive and easy to read.

UI/UX Developer: Hariharan

Role: Frontend

Developer: Vishnu Sudhakaran

Role: Backend

Assigned Module: Tier 2 (F7) – Search & Filter

Tasks:

- Create the Search & Filter interface.
- Implement search by Plate Number.
- Implement search by Vehicle Model.
- Implement filtering by Vehicle Status.
- Implement filtering by Assigned Driver.
- Implement backend APIs for search and filtering.
- Integrate the frontend with backend search and filter APIs.
